

Letter to Shareholders: Foreword

To Our Shareholders, Partners, and Community,

Thank you for joining us on this journey. In creating Hu\$\$h 🤖 Technologies LLC, we are building more than a firm; we are creating a new way of thinking about data, wealth, and community. Our vision is simple yet profound: to transform personal and business data into a valuable asset for everyone, powered by advanced AI, data-driven insights, and an unwavering commitment to long-term growth.

As we step forward, we are clear in our purpose and rigorous in our approach. Hu\$\$h isn't about high-risk speculation or promises of unimaginable returns. Instead, we focus on consistent, sustainable alpha—returns built on careful analysis, strategic discipline, and a blend of traditional and AI-driven strategies.

Our Value Creation Model: We believe that the future of wealth management lies at the intersection of human insight and machine intelligence. By integrating AI into our investment strategies, we uncover opportunities that traditional approaches may overlook, making data-driven decisions accessible and meaningful for every investor. And by focusing on the SPX10—the world's top free cash flow companies—we align with businesses that drive global innovation and long-term value.

Our Platform Vision: Beyond investing, Hu\$\$h is creating a powerful communication, commerce, and socialization platform tailored for communities of people, AI, businesses, and creatives. We are building a space where users can connect meaningfully, where businesses can thrive, and where AI can enhance human connection rather than replace it.

In the months and years ahead, we will continue to refine our strategies, uphold our principles, and push the boundaries of what a modern investment firm can be. We thank you for your belief in Hu\$\$h and our shared journey to redefine wealth for the future.

With gratitude and dedication,

Manish Sainani

Founder & CEO, Hu\$\$h 🤖 Technologies LLC
